About Axicon

Axicon Auto ID is a world leader in barcode verification, having developed and manufactured our own range of verifiers since 1989. Axicon barcode verifiers are used to measure the quality of linear and matrix barcodes, on all levels of product packaging.

Barcodes Direct
Online barcode images

Barcodes Direct is an internet-based service that allows clients to create and download the barcode images they need immediately. The .eps (Encapsulated PostScript) files are compatible with graphic design and word processor software packages, and the images are created to users' specifications to ensure that no further manipulation is required.

The choice of symbols includes EAN-8, EAN-13, UPC-A, UPC-E, GS1 DataBar, Data Matrix, GS1 DataMatrix, ITF-14, Code 128, GS1-128, as well as all the formats required for ISBN and ISSN numbering.

The software will calculate check digits for all the GS1 symbols that require them, and allow the user to choose the symbol's x-dimension, the symbol height, any bar width reduction that is required, and other options such as light margin indicators, or bearer bars.

The software is updated to ensure that it reflects the latest GS1 standards, and the introduction of any new barcodes.

Users subscribe to Barcodes Direct and receive an initial five barcode credits. Additional credits can be purchased and added on request.
